

siRNA

Combi -5

High performance siRNA sequence design software and high quality synthetic siRNA are provided as a set.

It's easy to apply!

Contact Information

Sales & Technical Support Dev.

+81-72-640-5180 info@genedesign.co.jp

*1 Sequence design is performed using siSNIPER of Mitsubishi Space Software Corporation.

*2 The siRNA is based on the license agreement between Alnylam Co., Ltd. (United States) and Gene Design Co., Ltd. (Japan).

* It is manufactured and sold for use in research and development.

We provide total support from exploratory research to clinical development

Oligonucleotide Custom Synthesis Service

siRNA, aptamer, antisense, decoy, miRNA, CpG...

We supply a variety of nucleic acid drug seeds with the most appropriate specifications, including those for cell assays, in vivo experiments, and GMP products for clinical development.

siRNA

- A wide range of supplies, from HTP plates for *in vitro* experiments to large scale synthesis
- Various fluorescent labels, 5' terminal phosphorylation, etc.

Aptamer

- 2'-OMe, 2'-F, etc. Chain modification, end addition of polymeric PEG, etc.
- Long RNAs > 80 mer can be synthesized (Applications such as pre-miRNAs)

in vivo grade

- Synthesis in clean room → purification, lyophilized under aseptic environment
- The endotoxin tested so safe for an animal experiment!

All products can be shipped from micrograms to hundreds of grams!
